

Chiara Luzzana

A NEW MUSICAL APPROACH

About

Hello.
I'm Chiara Luzzana
and I'm a crazy
Sound Artist.

About

**I'd like to transform
noises and objects into
*musical instrument.***

**As a rule of my creation,
I record pure sounds
from any kind of source,
giving them
*new life, rhythm and melody.***

I'm living between Milan and the rest of the world, **because the world is my Orchestra.**

I learned to listen to the sounds and the music even before I started to speak.

This soon became my language.

As a kid I studied guitar, clarinet and piano.

Then I decide **to brake the rules** and to improvise these instruments by mixing new sounds captured from **everyday life.**

I became an audio engineer in 2005.

As a rule of creation, *I record and alter pure sounds from the environment around me*, giving them new lives, rhythm and melody.

I transform noises and objects into harmony, without any traditional instruments.

I like to invent unusual musical instruments and sound sculptures that allow me to create visionary and original compositions.

I've created the worldwide project "**THE SOUND OF CITY**" ® to discover cities through a new sense: *hearing*.

—> www.thesoundof.city

I'm composer of soundtracks and audio installations for the **Venice Biennale** (Italy).

I won the Best Soundtrack for the "Soundtrart" prize, an international award organized by the Sandretto Re Rebaudengo Foundation (Italy).

I created the soundtrack for the **International Art Festival of Sapporo** (Japan).

I'm **finalist** for the international contest "Music+Sound Award 2016" (England).

I'm teaching Sound Design and Sound Art in some of the most important **Italian and Chinese Art Academies**.

In 2016, I've been invited for a **TEDx** speech to talk about my new project "THE SOUND OF CITY" ®.

I presented "**THE SOUND OF CITY**" ® at the **Shanghai Biennale** (Shanghai) on October 2016.

The background is a solid dark blue. It is decorated with numerous small, rectangular confetti pieces in various colors including white, yellow, orange, teal, green, brown, pink, and grey. These pieces are scattered across the entire frame, with a higher concentration around the central text. In the top right corner, there is a solid orange square.
